

The NISQ Members

The “Member [s]” are the Corporate Shareholder of the NISQ company, which is Global Security Qualifications Group Ltd. represented by the Board of Directors of Global Security Qualifications Group Ltd. [GSQ group]. The member appoints the NISQ Chairperson, the NISQ Directors, approve, propose and oversee amendments to the articles of association of NISQ, the NISQ scheme of Delegation and ensure value for money for the members. As the NISQ Ltd. corporate shareholder the GSQ group Ltd has a statutory duty of having its shareholding represented by the GSQ group Board of Directors at the NISQ AGM.

2018/2019 NISQ Member

- **GSQ group** - Board of Directors

Mr. W.M. McDowell the co-founder of the group and author of the NISQ Specialised Security Qualifications from level 2 to level 7 and the Praesum University foundation to master’s Qualifications. He is a past highly trained specialist security operator and nationally recognised specialist trainer. He has scripted more than 60 Specialised Security Qualifications which form part of the Praesum Specialised Security Matrix development pathway.

Mr. T.R. Poots the co-founder of the group and developer of the Qualification Matrix algorithm is an entrepreneur, concept initiator and place maker with over 25 years specialist experience initiating, developing and nurturing strategic alliances between local, national and international businesses and governments. He has established and managed high net worth commercial companies and a multi-million-euro EU funding organisation under the regional management of the Special European Union Programmes Body and represented the local and regional rural community in elected and mandated positions in the Northern Ireland Peace Process, Ulster Farmers Union, Lisburn Strategy Partnership and the Board of Governors of the local Primary School.

Trom Ltd. is a family owned I.T. software company, innovating and integrating mechanical, electronic and software engineering in the automotive, aerospace and security sectors. It’s wholly owned subsidiary, Tera proof, advised the Columbian government on hardened building design by request from the First Minster for NI. and has from initial concept, designed and developed a surface mounted "human rights" compliant blocking barrier which has been successfully MIRA tested against a 7.5 tonne lorry.
